

# Year 6 Home Learning Enrichment Activities – Autumn Term

<p>Create your own classification key to organise a group of animals or plants.</p>	<p>Free Writing – can you use any of the subjects we are learning about this term to inspire your writing? Or you can use your own ideas.</p>	<p>Complete more stamina reading at home and remember to record it on Boom Readers. Remember to look at the recommended reading list and don't forget to read non-fiction texts too!</p>	<p>Create your own food packaging like our Cereal Boxes. It does not need to be a cereal box – what else can you think of? Remember to think carefully about your typography.</p>
<p>Learn by heart the equivalent fractions, decimals and percentages for a half, a quarter and three quarters. Challenge – include fifths and eights.</p>	<p>Create a game to help you and others practise their grammar and punctuation.</p>	<p>Select your own MyMaths tasks to complete.</p>	<p>Create a shapes and angles prompt sheet to help you remember key facts. Could you include instructions for using a protractor?</p>
<p>Research an aspect of Buddhism that has interested you in greater depth and present your findings in a method of your choice.</p>	<p>Research in greater depth Charles Darwin and Alfred Russell Wallace and create a presentation about their theories about evolution.</p>	<p>Create a presentation about the Mayan Civilisation in any form you choose. It can either be about the whole civilisation or a more detailed investigation into one of the areas we have studied.</p>	<p>Investigate your garden or a local nature area. What animals and plants live there? What is the ecosystem and climate? What biome is it a part of? Present your findings however you choose.</p>
